Foreign Agricultural Trade of the United States

January/February 1988

SFA

IMPORTANT INFORMATION ABOUT YOUR SUBSCRIPTION

* Foreign Agricultural Trade of the United States is published six times a
* year with two supplements. Subscription prices are \$21 a year domestic
* and \$26.25 foreign (prices subject to change). Send check or money order
* payable to "Superintendent of Documents" to Superintendent of Documents,
* U.S. Government Printing Office, Washington, DC 20402. For faster
* service, call (202) 783-3238 and charge your subscription to your VISA,
* MasterCard, or GPO Deposit Account.

IS IT TIME TO RENEW?

* Your subscription to this publication may be due to expire soon. If so,
* you will get a renewal notice in the mail from GPO about 90 days ahead of
* time. Only one notice is sent. You must return it promptly to ensure
* uninterrupted service.

DIGEST

U.S. Agricultural Exports Turn Upward (see page 2). U.S. agricultural exports rebounded strongly in calendar year (CY) 1987, totaling \$28.6 billion and 133 million tons. Lower prices, increased world trade, and reduced competition helped exports climb 24 million tons, the first substantial gain in export volume since CY 1980. Export value rose 9 percent as lower grain prices offset much of the 31-percent increase in grain export volume. Grains and cotton each accounted for about one-third of CY 1987's \$2.4-billion increase, while oilseed and product value remained unchanged. High-value exports rose 9 percent to a record \$11.2 billion as a favorable exchange rate improved U.S. competitiveness.

U.S. Agricultural Imports Fall to \$20.4 Billion in CY 1987 (see p. 74). U.S. agricultural imports fell 5 percent in CY 1987 to \$20.4 billion. Canada became the largest U.S. agricultural supplier for the first time, surpassing Mexico and Brazil. Competitive imports, particularly those of fresh beef and pork, fresh fruit, and malt beverages, nearly overcame the drop in noncompetitive imports caused by the 37-percent fall in coffee imports.

Concessional U.S. Agricultural Exports Decrease In Value in FY 1987 (see p. 123). Agricultural export value under concessional U.S. Government programs decreased 7 percent in fiscal year 1987 to about \$1.1 billion. Volume, however, increased 6 percent to 7.4 million tons. Export volume under Public Law 480 rose 8 percent, volume under Section 416 of the Agricultural Act of 1949 more than doubled, but volume under programs administered by the Agency for International Development fell 44 percent.

Prepared by the Commodity and Trade Analysis Branch, Commodity Economics Division, Economic Research Service, U.S. Department of Agriculture. Principal coordinators were Thomas A. Warden and Mary L. Fant. Denise Morton provided word processing and table formatting support. Editorial support was provided by Teri L. Davis, Research Information Branch, Information Division, Economics Management Staff. Data processing support was provided by Sharlan Starr and William Meiller, International Economics Systems Branch, Data Services Center.

MAR 29 1988

U.S. AGRICULTURAL EXPORTS TURN UPWARD

U.S. agricultural exports rebounded strongly in calendar year (CY) 1987, totaling \$28.6 billion and 133 million tons. Lower prices, increased world trade, and reduced competition helped exports climb 24 million tons, the first substantial gain in export volume since CY 1980. Export value rose 9 percent as lower grain prices offset much of the 31-percent increase in grain export volume. Grains and cotton each accounted for about one-third of CY 1987's \$2.4-billion increase, while oilseed and product value remained unchanged. High-value exports rose 9 percent to a record \$11.2 billion as a favorable exchange rate improved U.S. competitiveness.

Corn Exports Rise Almost 14 Million Tons

U.S. corn exports rose 51 percent to more than 40 million tons in CY 1987. World import demand for corn grew in CY 1987, but foreign competitors were forced to reduce their exports. Dry weather reduced Thai and Argentine production, and growing domestic consumption reduced China's exports. This decline was the first setback for China after several years of phenomenal export growth.

During 1978-86, China's grain production soared as economic reforms increased incentives for farmers. Together, corn and wheat production rose as much as 16 percent annually. With income growing and larger supplies of wheat locally available, China's consumption shifted away from corn, a frequent response in low-income countries. With higher production and slowing consumption, China swung from importing 2-3 million tons of corn annually to exporting more than 6 million tons during 1982-86. But, in CY 1987, consumption gains caught up with production gains, reversing the trend. U.S. exports to China's Far Eastern customers rose, and the United States exported 1.2 million tons of corn to China as well, the first such sale since CY 1982.

Exports to Japan, South Korea, and Taiwan rose 3.7 million, 3 million, and 327,000 tons, boosted by an increased U.S. market share. Growing livestock numbers, feed consumption, and imports in Korea and Taiwan also boosted U.S. sales to these countries. However, Japan's feed consumption and total imports rose little. Increased exports to Japan depended solely on an increased U.S. market share. Despite the 64-percent decline in the yen cost of corn in Japan, coarse grain imports remained near 21 million tons for the third consecutive year. Increased meat imports replaced increased feedstuff imports.

Corn exports to Mexico rose nearly 2 million tons in CY 1987. Mexico is the developing country closest to the United States and is the largest U.S. customer among debtor nations. In CY 1986, Mexico's economy shrank 3.6 percent as petroleum prices tumbled and lenders slowed financing. To conserve foreign exchange, Mexico slowed imports, sometimes drawing down stocks of some agricultural commodities to a 1-month supply. An improved economic picture in CY 1987 helped Mexico rebuild foreign exchange reserves, boosting imports of corn and other products.

Despite 1 year's improvement, Mexico's economic prospects and ability to import remain poor compared with those at the end of the 1970's. Other debtor nations are in the same situation, with their ability to import constrained by either weak economies, low commodity prices, large debt repayment obligations, or some combination of these. Under such circumstances, reduced U.S. support

prices and the large decline in the U.S. dollar's foreign exchange value had limited effects on CY 1987 commodity sales to developing countries, especially for wheat.

Export Promotion Boosts Wheat Exports to 30 Million Tons

U.S. wheat exports rose 24 percent to 30.6 million tons in CY 1987, largely because of subsidies under the Export Enhancement Program (EEP). Most U.S. wheat is exported to developing countries. However, U.S. wheat exports to developing countries shrank in CY 1987, despite an 18-percent drop in U.S. wheat export prices and declining production by some foreign competitors. Total U.S. wheat exports rose 6 million tons above their 1986 volume, but shipments to developing countries slipped 795,000 tons to 18.2 million tons.

Economic difficulties in developing countries have forced currency devaluations that virtually parallel changes in the U.S. exchange rate. For the average U.S. wheat customer, the dollar declined only 4 percent in real terms between the February 1985 peak and the December 1987 level, compared with real declines of at least 50 percent against the Japanese yen and German mark. This means that the weaker dollar has not reduced the cost of wheat imports for developing nations. For Nigeria, the cost of importing wheat became so onerous that imports were banned in 1987, and U.S. exports there fell almost 1 million tons. Without renewed economic growth, weak purchasing power will continue constraining imports in Nigeria and other developing debtor countries.

Most of 1987's additional wheat sales were to centrally planned economies and involved the EEP or other U.S. Government programs. Wheat exports to the USSR, China, and Eastern Europe rose 4.8 million, 1.9 million, and 900,000 tons. The EEP also raised exports to North Africa 1.2 million tons, following the 2.5-million-ton gain for U.S. wheat sales to the region in CY 1986. The 1986 gain in North Africa was also a product of the EEP, and about 70 percent of all U.S. wheat exports involve U.S. Government programs, including the EEP, the Export Credit Guarantee Program (GSM-102), the Intermediate Export Credit Guarantee Program (GSM-103), and P.L. 480. Wheat is the U.S. farm export product with the largest direct Government role. However, changes in U.S. policy were an important factor in determining the level of exports for other commodities in CY's 1987 and 1986.

Purchasing Delays Reduced CY 1986 Exports

U.S. loan rates and export prices fell during 1986, well after provisions of the Food Security Act of 1985 mandated downward adjustments. The prospect of lower U.S. prices within a few months temporarily created another lower priced alternative to purchasing from the United States.

In competition with overseas exporters, U.S. summer wheat, corn, and cotton exports during 1986 fell to their lowest level since the early 1970's. Thus, while U.S. corn and cotton exports rebounded strongly in CY 1987, accounting for 60 percent of the year-to-year gain in U.S. export value, gains were much smaller compared with exports of 2 years earlier (table 1).

Cotton Exports Sharply Higher Than in CY 1986

A rebounding share of an expanding world market pushed U.S. cotton export volume up 87 percent from year-earlier shipments to 1.3 million tons. The initiation

of a U.S. marketing loan program in August 1986 closed what had become a large gap between world and U.S. prices during CY 1986. Under the marketing loan program, U.S. cotton producers can repay loans to the U.S. Commodity Credit Corporation at a rate that varies with world cotton prices.

Importers delayed purchasing U.S. cotton during much of CY 1986, and cotton sales to every major customer fell about 40 percent, as did total cotton sales. In CY 1987, the United States recovered its traditional 33 percent world trade share for cotton, and cotton sales to the three major U.S. customers rose simultaneously. U.S. cotton exports in 1987 rose 18 percent over 1985 levels, while those to Western Europe, Japan, and Other East Asia rose 13 percent, 22 percent, and 26 percent.

Exports of oilseeds and products were virtually unchanged in CY 1987, remaining near 29 million tons and \$6.4 billion. Policy changes in recent years have less directly affected U.S. oilseed trade than trade of other bulk products, such as grains and cotton. Surplus stocks of soybeans and soybean meal in the United States and overseas have remained substantially smaller than those for grains during the 1980's. U.S. soybean exports did not suffer anticipation-induced declines in CY 1987 as did grain and cotton exports during the summer of 1986.

The European Community (EC-12) remained the largest customer for U.S. oilseeds and products in CY 1987, purchasing 12.8 million tons at \$2.6 billion. High grain prices and reduced dairy quotas helped cut coarse grain feeding 4 million tons in the EC-12 from 1 crop year to the next during CY 1987, and wheat feeding fell 1 million tons as well. However, soybean meal consumption rose 1 million tons, and despite growing domestic oilseed production in the EC-12, U.S. soybean sales to the EC-12 rose slightly. On average, the real U.S. exchange rate has declined further for soybeans than for any other bulk commodity. For example, the local currency cost of imported soybean meal in West Germany fell 56 percent between February 1985 and December 1987, providing an incentive for consumption.

Table 1--Percentage changes of export performance since 1985 1/

Volume	-12	22
Value	1	9

1/ Data are for calendar years.

U.S. sales to Taiwan and South Korea rose slightly. Exports to the USSR fell 1.3 million tons, and those to Japan also declined somewhat. Although Japan is the largest market for U.S. oilseeds and products outside of the EC-12 and is a strong currency country, Japan's imports of soybeans and other livestock feedstuffs have remained stagnant.

Animal Product Exports Reach Record High

U.S. exports of animals and animal products rose \$610 million to a record \$5.2 billion in CY 1987, the largest increase after cotton exports. Much of the gain stemmed from the U.S. dollar value change. The largest increase in U.S. animal product exports went to Japan, where U.S. sales rose \$175 million, or 14 percent. Japan's meat imports rose in CY 1987 as the strength of the yen encouraged increased meat consumption but had limited effect on meat production. Several years of low prices for Japan's pork producers led the Japanese Government to issue administrative guidance on discouraging production. Also, compound feed prices in Japan remained high because of contributions to a price stabilization fund. Because of this fund, which was set aside in anticipation of price increases, the 64-percent drop in local currency costs for corn has not translated into a similar decline in feed prices or an increase in livestock production. Instead, Japan's meat imports from Thailand, Taiwan, Australia, and the United States have increased.

Since the share of imports in Japan's pork consumption is only 16 percent and beef's import share is only 34 percent, each per capita consumption increase has translated into an import increase that is 3-6 times larger than the consumption gain. In addition, in a 1984 U.S.-Japanese understanding, Japan agreed to expand imports of grain-fed beef by 6,900 tons per year. In CY 1987, U.S. beef exports to Japan rose 14,000 tons, following a 30,000-ton increase in CY 1986. U.S. beef exports to Japan rose \$78 million in value in CY 1987, pork exports rose \$38 million, and poultry meat exports rose \$1 million.

Animal and product exports to the EC-12 fell \$4 million to \$767 million. The EC-12 is the world's largest beef exporter, and meat and dairy surpluses in the EC are large. Under these circumstances, EC policies will have a much greater effect on U.S. sales to the region than will exchange rate changes. The EC-12 proposal to ban meat imports with any residue of hormone additives is an example. Most other high-value product exports do not face such barriers in the EC-12 market, and the EC-12 was one of the best U.S. markets for these products.

Horticultural Exports Increasingly Competitive

U.S. exports of fruit, fruit juice, nuts, and vegetables rose \$304 million in CY 1987 to \$3.4 billion. Exports of fruit, nuts, and vegetables, excluding pulses, hit record highs. The largest increases came in nut and fruit exports to the EC-12, when nut exports rose \$84 million and fruit exports rose \$70 million. Fruit exports to Japan rose \$64 million, the next largest increase. The EC-12 remained the largest U.S. customer for horticultural products for the second consecutive year, with sales reaching \$900 million compared with Canada's \$692

million. Canada has traditionally ranked number one, relinquishing that spot for the first time in CY 1986. 1/

Record-high almond prices failed to deter European importers in CY 1987, but the value of U.S. almond sales to Japan declined as the volume of almond sales plunged 40 percent, offsetting the 20-percent price increase. However, a poor almond crop in Spain and smaller supplies of Turkish hazelnuts sustained the EC-12's demand for imports from the United States. In total, U.S. nut exports rose \$51 million and would have declined in CY 1987 without the rise in sales to the EC-12.

Unlike nut exports, fruit and preparation exports improved largely across the board, with a \$64-million increase spread across most major products and customers. Exports of every category of fruits, except oranges and tangerines, rose in value or volume in CY 1987. Among these rising fruit exports, the largest increase was \$64 million for other fresh noncitrus fruit, which includes pears, peaches, plums, and cherries. This broad distribution of gains in U.S. fruit exports across products implies a response to economic factors rather than changes in U.S. or overseas supplies. In foreign developed countries, while gross national product growth in CY's 1986-87 was slower than in 1984-85, total domestic demand grew slightly faster. However, these changes in overseas consumption were modest compared with the spurt in U.S. high-value agricultural exports to these same countries.

The steep decline of the U.S. dollar in 1985-87 earned a larger niche for these products in foreign markets. Like U.S. manufactured products, high-value exports were better positioned to respond to the dollar's decline, and both U.S. manufactured exports and high-value agricultural exports reached record highs in CY 1987 (fig. 1).

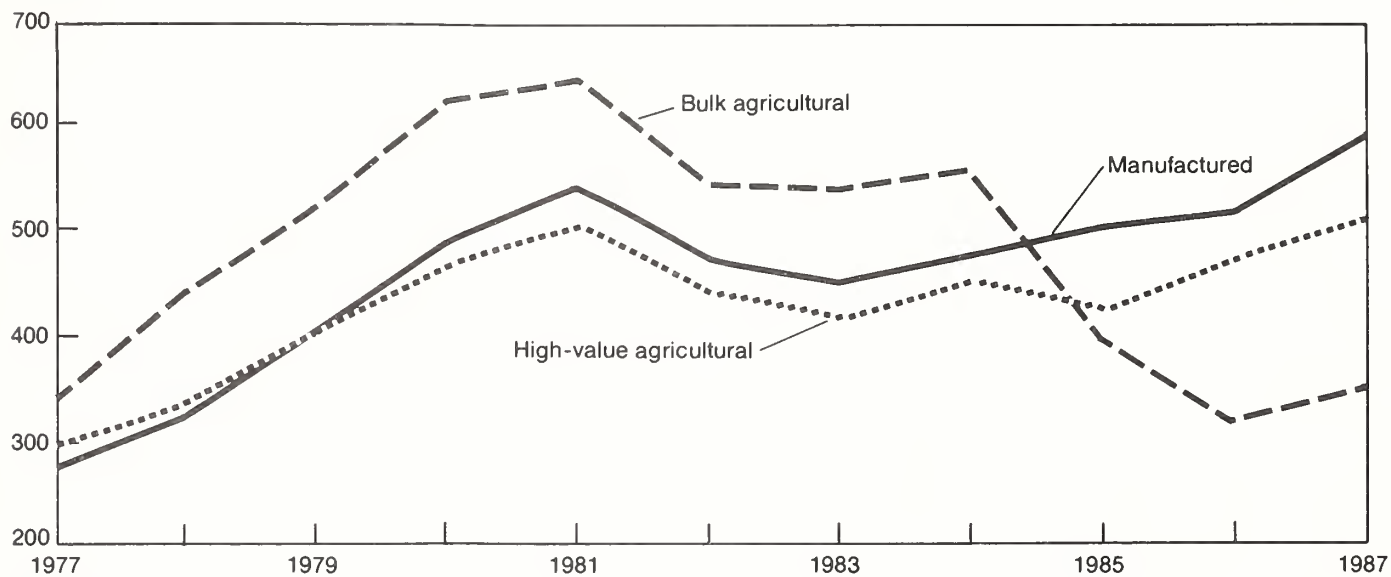

On the other hand, bulk exports rose in CY 1987 largely in a recovery from the transition year of CY 1986. Also in 1987, Government programs reduced U.S. prices, poor weather reduced competitor production, and world consumption grew. However, U.S. exports and market share remained low compared with the peaks of the early 1980's. The 8-percent gain in bulk export value in CY 1987 represents only the first step towards the vigor that marked the 1970's. (Stephen MacDonald, Commodity and Trade Analysis Branch).

1/ Underreporting problems affect data on U.S. exports to Canada. The U.S. Department of Commerce (USDC) adjusts its report of total export value to compensate for this underreporting but does not include these adjustments in its data for individual commodities or commodity groups. This adjustment added \$10.2 billion to U.S. exports in CY 1986 and \$6.4 billion in CY 1987, but no adjustments were made to USDC or U.S. Department of Agriculture data for horticultural or other agricultural exports.

Figure 1

High-value and bulk exports reverse roles in the 1980's¹

U.S. AGRICULTURAL IMPORTS FALL TO \$20.4 BILLION IN CY 1987

U.S. agricultural imports fell 5 percent in calendar year (CY) 1987 from \$21.4 billion to \$20.4 billion. Nonagricultural imports climbed 10 percent to a record \$382 billion. In 1950, nearly half of U.S. imports were agricultural products. By 1987, agricultural products had fallen to 5 percent of U.S. imports. Agricultural imports grew at a rate of 8 percent annually in 1950-87, while nonagricultural imports grew at a rate of 15 percent annually (fig. 2).

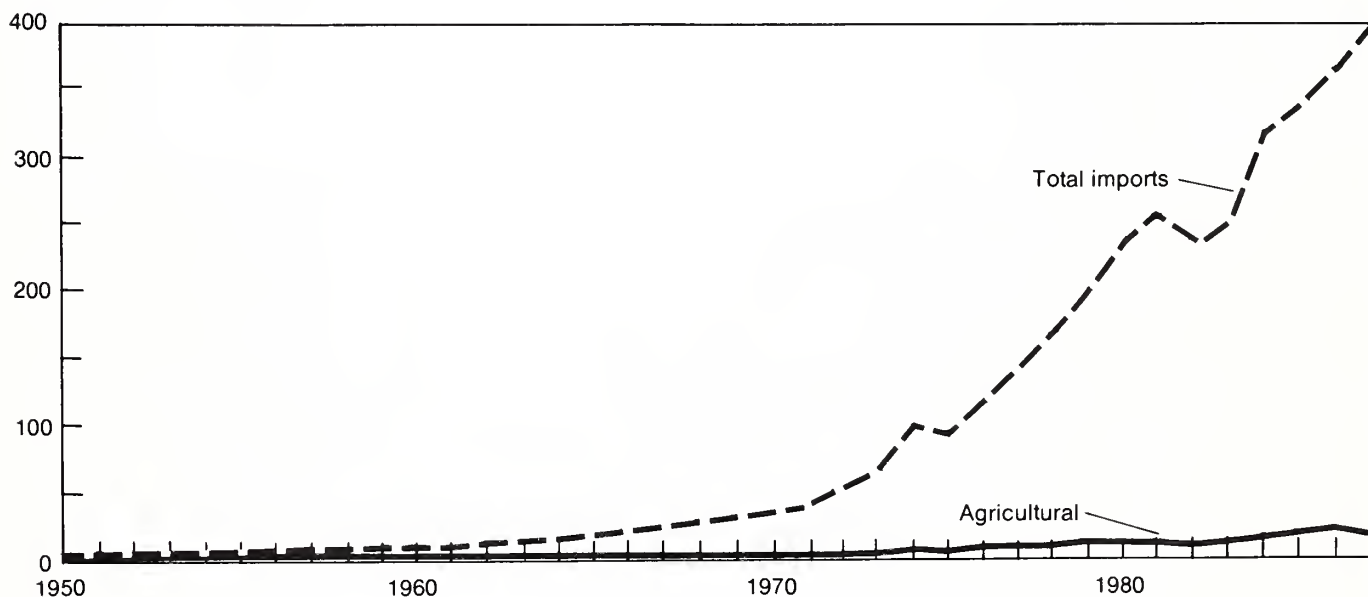

The exchange rate of foreign currency per U.S. dollar has been falling since early 1985. For instance, the exchange rate of the Japanese yen fell from 260 yen per U.S. dollar in February 1985 to 130 yen in January 1988. Dollar depreciation generally should raise U.S. prices for imported goods and simultaneously lower U.S. import volume. Trade indices from the U.S. Department of Commerce reveal that import volume is slipping, while prices are gradually rising.

For the first time, Canada became the largest agricultural supplier to the United States in CY 1987, with sales of \$2.2 billion, surpassing Brazil and Mexico. Canadian exports to the United States consist primarily of fresh pork, fresh beef, live cattle, live hogs, grain products, and malt beverages. Other major agricultural suppliers were Mexico, Brazil, Australia, Colombia, France, Indonesia, the Netherlands, New Zealand, and Denmark.

Figure 2

U.S. imports, 1950-87¹

\$ billion

¹Calendar years.

Noncompetitive Imports Fall 17 Percent

Noncompetitive agricultural imports fell 17 percent in CY 1987 to \$6.6 billion. That level remains very high compared with those of earlier years. Noncompetitive agricultural imports peaked at \$7.9 billion in CY 1986, largely due to record coffee imports. In CY 1987, coffee imports fell 37 percent to \$2.9 billion. A coffee surplus and a discontinuation of International Coffee Agreement export quotas drove coffee prices down to under \$1 per pound in 1987 from \$2.30 per pound in February 1986. Coffee imports in October 1987 were much higher than usual, as exporters attempted to ship before the export quotas were reinstated on October 6.

Rubber imports rose to \$760 million in CY 1987 from \$622 million, despite a 15-percent price increase. Indonesia, Malaysia, Thailand, and Liberia supplied 93 percent of U.S. rubber import value. These four countries and Sri Lanka constitute a 94-percent share of world rubber trade. Although only five producers have such a large share of the world rubber industry, the presence of synthetic rubber (a very close substitute for natural rubber) maintains a high degree of competition in the industry.

The value of imported cocoa beans and products (cake, powder, and chocolate preparations) rose 6 percent in CY 1987 from the CY 1986 level, as prices dropped for all cocoa products, with the exception of cocoa cake. U.S. imports of cocoa butter and cocoa cake reached record highs in CY 1987, while cocoa bean imports rose 28 percent to 263,000 tons. U.S. cocoa bean imports have fluctuated widely in the last 8 years, rising to 270,000 tons in CY 1985 and falling to 150,000 tons in CY 1980. Thus, the decision to purchase cocoa products apparently predominates, and residual needs are met by bean imports. Brazil, the Ivory Coast, Ecuador, the Dominican Republic, Canada, Ghana, the Netherlands, and Malaysia accounted for 83 percent of total U.S. cocoa product imports.

Competitive Imports Up 5 Percent

Competitive agricultural imports, at \$13.8 billion, set a record for the fourth consecutive year. Beef, pork, casein, furskins, wool, grains, fresh fruit, tobacco, malt beverages, and seeds gained the most during CY 1987. In most cases, both volume and price increased, although tobacco and seed prices fell.

Australia, New Zealand, Canada, and Costa Rica accounted for 95 percent of fresh and frozen beef import value in CY 1987. U.S. beef production dropped 4 percent in CY 1987. As a result, meat imports under the Meat Import Law rose from 1.40 billion pounds in CY 1986 to 1.44 billion pounds in CY 1987. Voluntary restraint agreements that limited beef shipments from Australia and New Zealand in the last few months of CY 1987 eliminated the possibility of additional U.S. beef imports. These agreements were signed to prevent U.S. beef imports from exceeding the "trigger level," at which official quotas would have been imposed. In December 1987, the Secretary of Agriculture set the CY 1988 trigger level for beef imports at 1.53 billion pounds.

Pork imports rose 8 percent in CY 1987 to 461,000 tons, as live hog imports, particularly from Canada, fell 12 percent to 446,000 head due to

a countervailing duty set in 1985. Imports from Canada, Denmark, and Poland accounted for 86 percent of fresh, frozen, prepared, and preserved U.S. pork imports. Imports from Canada and Denmark alone constituted 96 percent of fresh pork imports.

Fresh fruit imports jumped 23 percent in CY 1987 to \$638 million. Fresh grapes led the way, followed by apples, melons, and strawberries. Chile and Mexico were the primary U.S. suppliers.

U.S. import volume of frozen concentrated orange juice (FCOJ) fell 5 percent during CY 1987 to 522 million gallons, its lowest level in 4 years. Yet, this figure is 10 times greater than U.S. FCOJ imports of only 10 years ago. In the crop year that ended in November 1970, imports accounted for a negligible amount of domestic U.S. FCOJ consumption. In the last few years, this percentage reached 35-40 percent. (Stephen R. Milmoe, Commodity and Trade Analysis Branch)

CONCESSIONAL U.S. AGRICULTURAL EXPORTS DECREASE IN VALUE

Agricultural exports under concessional U.S. Government export programs decreased 7 percent in fiscal year (FY) 1987 (October 1986–September 1987) to about \$1.1 billion. Volume increased 6 percent to nearly 7.4 million tons. The bulk of these exports were shipped under the Public Law (P.L.) 480 program, but significant quantities were also shipped under Section 416 of the Agricultural Act of 1949, as amended. Slightly less volume was exported under programs administered by the Agency for International Development (AID). Wheat, soybean oil, and wheat flour were the chief commodities shipped under concessional programs, and Egypt, Bangladesh, and Pakistan were the top destinations. These programs accounted for about 4 percent of U.S. agricultural export value in FY 1987.

Exports under P.L. 480 declined 2 percent in value to approximately \$944 million and rose 8 percent in volume to about 6.3 million tons. Wheat, soybean oil, and wheat flour accounted for about 75 percent of the P.L. 480 export value, while Egypt, Bangladesh, and Morocco, the top three recipients, received about 33 percent of P.L. 480 export value. Egypt, Bangladesh, and Indonesia received nearly half of P.L. 480 wheat exports, while about half of soybean oil exports under P.L. 480 was shipped to Pakistan, Morocco, and India. Egypt and Sudan accounted for about 80 percent of P.L. 480 wheat flour exports.

The P.L. 480 program consists of three programs: Title I, Title II, and Title III. Under Title I, the U.S. Government provides long-term concessional credit to designated countries to purchase specific U.S. agricultural commodities. The Food Security Act of 1985 reinstated cash sales of U.S. farm products for local currency under Title I to generate economic growth through the private sector in recipient countries. Under Title II, the U.S. Government donates food commodities that are distributed through voluntary relief agencies (such as CARE and Catholic Relief Services), the World Food Program (WFP), and government-to-government channels. Under Title III, a Title I loan may be forgiven if the recipient government achieves certain development-related measures.

Shipments under Titles I and III accounted for almost 75 percent of P.L. 480 exports. Under these programs, U.S. agricultural exports increased 16 percent to \$686 million and almost 5 million tons in FY 1987. Most of the Title I exports were shipped under concessional credit terms, although the Dominican Republic, Jamaica, Morocco, Sri Lanka, and Tunisia received commodities under local currency cash agreements. Ten commodities were shipped under Titles I and III, with wheat, soybean oil, and wheat flour constituting the majority of these shipments. Of the 32 recipients, Egypt, Bangladesh, and Morocco were the chief destinations of commodities shipped under Titles I and III. Egypt, Bangladesh, and Indonesia received almost half of the wheat, while Pakistan, Morocco, and Bangladesh received most of the soybean oil. Egypt and Sudan took all of the wheat flour exports shipped under Titles I and III.

Donations under Title II declined sharply in value and volume to about \$248 million and 1.2 million tons. About half of the commodity value was distributed through voluntary relief agencies. Slightly more than 25 percent was distributed through government-to-government channels, and almost 25 percent was shipped through the WFP. Soybean oil, corn-soya-milk, and wheat were the principal donated commodities. Nearly 45 percent of the soybean oil was shipped to the top three recipients: India, Mozambique, and Pakistan.

India, Botswana, and the Philippines took 87 percent of the corn-soya-milk exports, and Pakistan, Bangladesh, and Haiti took the bulk of Title II wheat exports.

Section 416 of the Agricultural Act of 1949, as amended, authorizes overseas donations of edible commodities owned by the Commodity Credit Corporation (CCC). In FY 1987, close to 600,000 tons of edible CCC-owned commodities worth about \$133 million were shipped under Section 416. Volume more than doubled, mainly due to sharply higher wheat shipments. However, export value declined since the volume of the higher value dairy products declined, and additional lower cost commodities were shipped. Wheat, nonfat dry milk, and cheese constituted more than 75 percent of the export value of commodities shipped under this program. Mexico, the Dominican Republic, and the Philippines received almost 45 percent of exports shipped under Section 416. The Dominican Republic and the Philippines took more than two-thirds of the Section 416 wheat exports, and Mexico, Guatemala, and Brazil took the bulk of the Section 416 nonfat dry milk exports. Mexico received almost 70 percent of the cheese exported under this program.

AID administers mutual security assistance programs, such as the Commodity Import Program, which involve a small amount of agricultural exports. In FY 1987, the export value under these programs declined 55 percent to about \$60 million and 44 percent in volume to about 549,000 tons. These exports included mostly corn, soybeans, and soybean meal. Egypt and Jordan received all of the corn, while Egypt received all of the soybeans. AID-authorized soybean meal exports went to Egypt and Zaire. (Mark E. Smith and Fannye G. Lockley, Commodity and Trade Analysis Branch)

1/ Preliminary.

2/ Authorized by The Food Security Act of 1985.

3/ Negative values in the "commercial" column indicate an excess of Government programs over total exports attributed to reporting lags, classification differences, or transshipments through other countries.
